## THE WAY WE WORK...

Our mission is to plan for people, to create spaces for people to live in, and to make sparing use of resources while maintaining a high level of design quality and environmental compatibility. Our innovative concepts enable us to create an optimal standard of living with and inside the structures we design. Our architecture is not as an end in itself, but serves the needs of human beings. It is our contribution to society, our part in making the world a better place to live in.

For us, architecture means teamwork, discussion, and service based on an exceptional level of mutual trust. Continuous dialogue and close co-operation with individual clients and others involved in planning enable us to find rapid, rational solutions to even the most complex problems. Yet we have always retained that individual and personal touch that ensures even quite small or shared building projects are handled by a team of the right size, made up of the right people.

Our team is composed of creative, innovative and communicative individuals who share a fascination for their work, and a readiness to become emotionally involved with each project as it develops. Meeting the daily challenge of competition, in both large-scale and small-scale contexts and succeeding in our work is only possible with a team that is capable of enthusiasm, and which is built on a basis of friendship and mutual trust.

The strengths of all our team members are creativity, expertise, individual initiative and responsibility, enabling us to achieve the optimal outcome together.

Architectural services & urban planning:-

- all stages of the work from preliminary design to site management
- Competent, intelligent general planning.
- Administration and laboratory planning.

ALLIED CONSULTANTS ENGINEERING

## VISION…

Our vision is to grow our multi-disciplinary team in order to offer a broad spectrum of specialist Engineering, Information Technology and Management Consulting services to become our Clients' preferred Professional Service Provider (PSP) choice through excellence and efficiency in all aspects of the project life cycle.

Whether it is a building project, civil engineering project, implementation of a project management system, or programmed management of a multi-facetted initiative,Allied Consultants is a leading practice that will exceed expectations and set new standards!

## MISSION STATEMENT…

Our Mission is to offer excellent service in each of our professional disciplines, in accordance with statutory practices, codes of conduct and integrity, thereby developing our team and providing a leading platform from which to service the built environment and in particular, our valued Clients.

## APRROACH...

Allied Consultants sees teamwork on every project as the key success ingredient and are responsible for creating this environment. The overall project manager is duty-bound in ensuring effective communication to all stakeholders and at all levels.

Teams are built by combining the strengths of the individual members and refining skills to meet and exceed the Client's expectations. We also believe in a hands-on approach on all our projects. This is why a Director of the firm will always be in control of the key functions on a project.

Allied Consultants is equipped with the latest technology and has the necessary staff and resources to ensure the best professional service is provided at all times.

We are committed to teamwork, innovation, excellence and to the highest levels of client satisfaction. Our ability to pool in resources and technology from various regions allows us to offer bespoke integrated solutions to our client with a single source responsibility.
We deliver better results to our clients through the provision of the following multi-disciplined services :-

- Pre-concept design
- Feasibility Study
- Interior Design.
- Exterior Design.
- Architectural & civil design.
- Landscape & lighting Design.
- MEP design.
- Model making.
- 3D photos & video animation.

We deliver optimized solutions, from a broad compendium of products and services, to the private and public sectors, from a wide range of market segments.
These include:

- Commercial and Residential Buildings
- Villas and Palaces
- Hospitals
- Industrial factories and warehouses
- Hotels
- Malls & parks

Particular experience has been gained in a number of specialist areas including:

- Conceptual designing and project brief.
- Technical and financial feasibility studies.
- Inquiries and planning consultation with authorities
- Preliminary and detail designing.
- Quality control and assurances.
- IT management and supervision.
- Technical assistance after completion.
